TAMPER EVIDENT LABELS

Tamper evident labels are that the security hidden message/pattern reveals itself on security label after removed, showing physical evidence of removal. The damage of tamper proof labels is obvious & permanent, can't be returned as before.

The thickness, color, security hidden message, adhesion and top printing of tamper evident security labels can be customized for unique requirements.

A. Transfer tamper evident VOID labels are that the security hidden message/pattern reveals itself on tampered security label and application surface, showing physical evidence of removal.

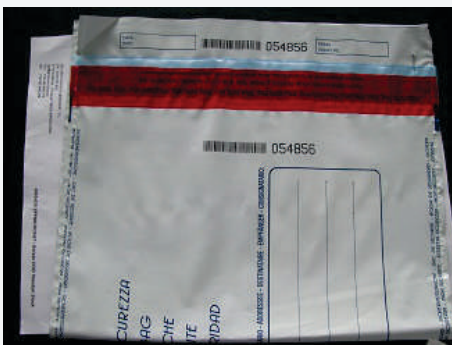

B. Non transfer tamper proof void labels are that the security hidden message/pattern reveals itself on tampered security label but no residue transfer on application surface, it showing physical evidence of removal and keep surface clean without dirty. The removed security void labels are still with sticky, thus can be stuck again, but the damage of tamper proof labels is the same obvious and can't be returned as before.

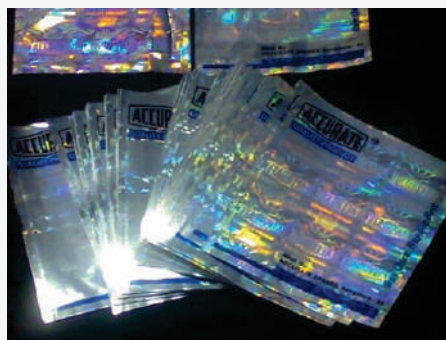

SECURITY BAGS

Tamper evident security bags are such that the hidden security message is instantly revealed between the security tape and the security bag itself once you try to open it. Security pouches are manufactured with different security levels and tamper-resistant straps for different applications. Such as only Level 1 with tamper-resistant function, Extra Level 2 with Water Sensitivity feature, Extra Level 3 with Heat Sensitivity feature, and Extra Level 4 with Cold Resistant feature. The color of the base material of tamper-proof security bags can alternate between transparent or opaque for different uses. Security pouches can be customized according to special requirements, which include: - Material thickness and color - Size and printing - Serial numbers or/with barcodes - Writable area - Hand holder - Receipt - Security level

The size, thickness, top security printing, security levels, serial numbers, barcodes, receipts, document pouches, air dots and security welding of security tamper evident bags can be customized for unique requirements.

SECURITY BAGS

1. Bank deposit bag Today's best solution for secure bank deposits and armored car transfers. Today's single-use bank deposit bag offers CFOs three important advantages: Increased security for cash transfers, Lower costs, Ease of use.

2. Secret document security bag Educational testing materials, legal documents, medical records – just a few of the sensitive areas that require “eyes only” protection for sensitive documents.

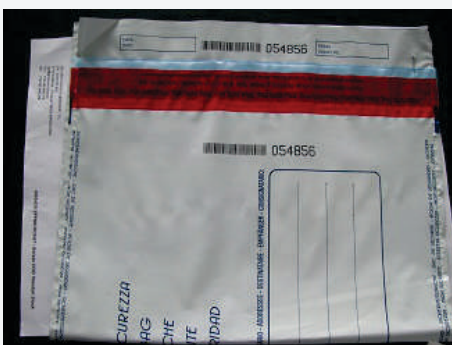

3. Chain of custody security bag From police evidence to scientific sampling, there is one fact that cannot be refuted in any protocol – the initial security of the sample and the subsequent chain of custody can have ramifications for years into the future.

4. Medicine stock safety bag Protocols ensure consistent application of proven treatment strategies. A drug safety kit can be a valuable tool in any protocol that requires control of drug distribution and use. The Medicine Security Bag is specifically designed to provide a high level of security and accountability.

5. Property security bag Collecting, storing and transporting personal belongings is a serious responsibility. The Property Security Bag is specifically designed to provide a high level of security and accountability. The Property Security Bag combines features such as double-consecutive serial numbers with corresponding barcodes and tamper-evident OPEN/VOID bar closures to provide security protection for the property owner, as well as the property manager.

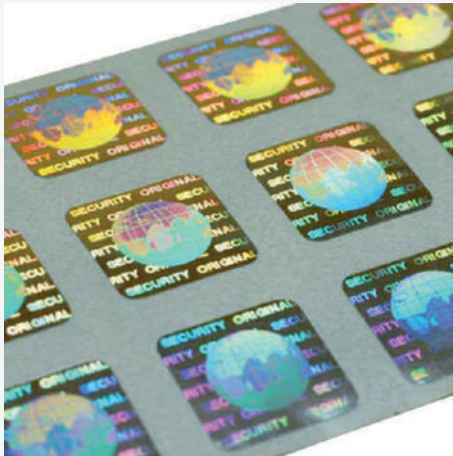

6. Security bubble mailing bags Based on the same security technologies as our other security bags, the bubble security bag offers important advantages over a traditional mailing envelope: - Bubble plastic films inside - High Impact - Tamper Proof Seal - Water Resistant - Lightweight and puncture-resistant. Present your message or communicate information - The graphic effect of your envelope prompts the recipient's interest to immediately open or "save" it. In today's world of information overload, only the highest-impact package receives high-priority attention. In addition to graphic appeal, your Bubble Safety Bags can be custom designed using any of the Safety Bag's security features. This includes standard or maximum "void" tape closures, serial numbers and receipts. The Bubble Safety Bag comes in an easy-to-use continuous roll. We can help you design your own custom bubble safety bags. Email, fax or call for design assistance and quotation.

7. STEB Duty Free Security Bags Recognized by the International Civil Aviation Organization (ICAO) as a STEB registered manufacturer of air travel. Close:- Uses a special safety closing system, Level 4 Tamper Proof Security Lock - High Touch Pressure Sensitive Security Tape (Self-Locking) - State of the art tamper evident safety graphics, extremely sensitive to cold and heat. - Identification of reactive security graphics for solvents:- The three-letter country code or ICAO airline code (for duty-free sales on board) identifies the origin of the STEB provided to the passenger. Features and Capabilities: - Available in the following security closures:- Security level 4.- STEB bags can be customized according to your specifications.- For more information about our STEB security packaging system, please contact us.

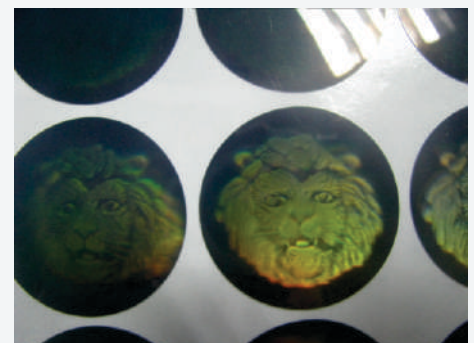

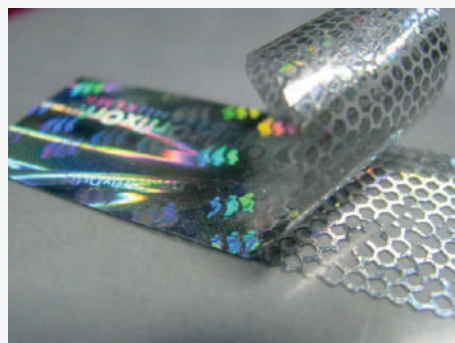

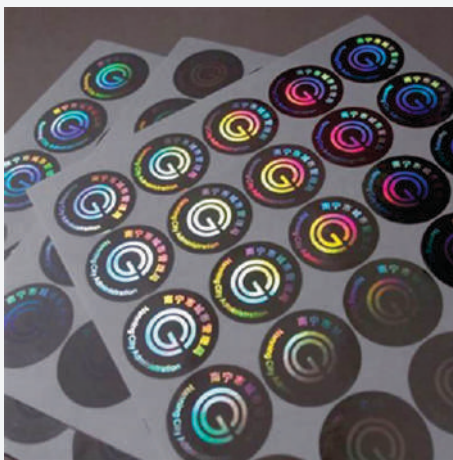

SECURITY HOLOGRAM LABELS

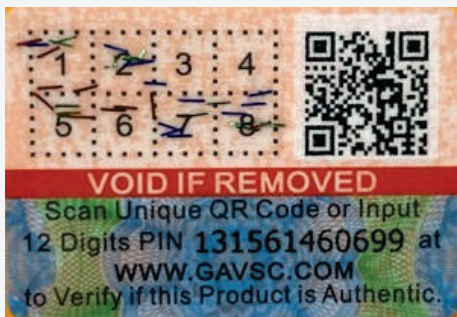

Packguard Security Hologram Labels are dedicated to providing manufacturers and consumers with the highest level security for products, packaging, and documents. Our self-adhesive tamper-evident security hologram labels provide security, authentication and protection against counterfeit. Packguard security hologram stickers are the best choice for Anti-Counterfeiting Solutions. Our manufacturing processes utilize the latest security technologies and techniques, thus making it virtually impossible for counterfeiters to create fake products or forge documents protected by holograms. When you choose security hologram labels to protect your products, you are essentially purchasing an insurance policy that keeps your revenue and your consumers safe from the clutches of counterfeiters and their low-quality goods. Using of our products may not prevent forgeries and counterfeiting completely, but it sends a message that your company isn't going to sit back and let others profit from your ingenuity and investment. A company's decision to integrate a security holograms system into its line of products is a positive marketing decision and a good economic choice. It is a decision that ensures only GENUINE products and goods are being sold and purchased, plus it makes counterfeiting more difficult and less likely. Because they are already highly valued for security, holograms are rapidly becoming the only method for protection against counterfeiting. So for a Totally Secure Solution from a source you can trust, choose Packguard Security Hologram Labels for your product's and your customers' protection.

Security Hologram Labels and Stickers

QR TEXTURE SECURITY LABELS

Security Texture Labels are made with unique random metal dots and printed QR codes on top of tamper evident void security label materials. Security Texture Stickers are unique that impossible to be counterfeited. Security Hologram Labels and Stickers

The size, top security printing, QR Codes, random metal dots and label stock of Security Texture Stickers can be customized for unique requirements.

Custom text is available shown on webpage when scanning the QR code. The below text is an example for your reference:

GAVSC® Scan Authentication

We would like to Thank You for taking the time to ensure that you are getting only the best Quality, Style, and Performance that our brands have to offer.

Alright! Let's see if this is an authentic product you are looking for!

We have a two-stage verification match.

Simply compare the security label you scanned to the image above.

Verify that the following match:

1. Unique 12 digits security PIN
2. Unique Metal Strips: Positioning, Color and Quantity of the metal strips found in the Eight Section Security Zones are unique to this item. These little metal strips are randomly applied to each Security Label to ensure no two are alike. **THIS CAN'T BE CLONED!**

Safety System

All security sticker photos are saved in safety system. These photos will appear on Webpage when scanning the QR Codes with smart phone. The consumers can compare all features between photo and real sticker. **GOT A MATCH?** You can be confident you are holding the genuine article. You may purchase with assurance. **NOT A MATCH!** Thank the proprietor for his time and quietly walk away.

Unique

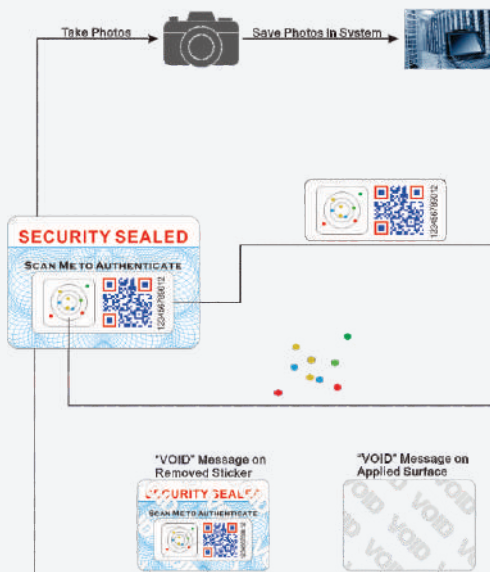

Each unique QR Code on security sticker complies with unique Security Random Dots. No two pieces of security stickers they have the same Metal Dots and QR Codes.

Security Random Dots

Security Random Dots are made of metal dots, that can be took out from Security Sticker. Positioning, Quantity and Color of the metal dots found in the unique Security Zones are unique to this item. These little metal dots are randomly applied to each Security Sticker to ensure no two are alike. **THIS CAN'T BE FAKED!**

Tamper Evident

The hidden message "VOID" will appear on removed security sticker and leave on applied surface at when removal is attempt. It can not be resealed, and avoid to be used on fake products.

SECURITY HOLOGRAPHIC POUCHES

Specially designed heat seal laminating pouches incorporating transparent holographic imagery. Uses included laminating ID cards, membership cards, parking permits, passes and documents. Add holographic images, UV readable or optically variable inks along with serial numbers to protect what you need to be most secure. Custom security pouches are available in many sizes with a small minimum quantity requirement.

The size, holographic image, security hologram technologies and top printing of transparent hologram laminating pouches can be customized for unique requirements.

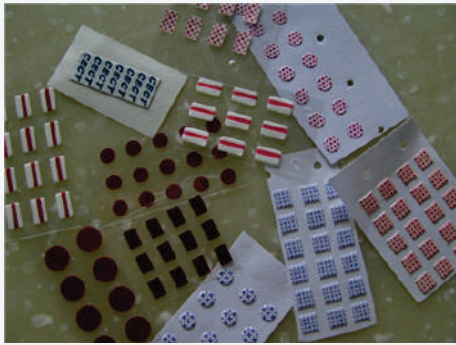

Transparent Holographic Laminating Pouches

The Transparent Holographic Laminating Pouches are embossed with high security hologram images. The security hologram images, thickness and size can be customized for unique requirements.

Hologram ID Card Lamination Pouches offer you a High level of protection for ID cards, badges and licenses at a affordable price. Pouches are used to laminate ID cards which are printed on paper. The heat-welding lamination provides durability; thicker lamination creates a more durable identification card. The heat-welding adhesive provides some tamper-evidence. Attempts to remove the lamination usually results in tearing of the paper ID card. They offer protection against attempts at tampering and alteration made using common materials and printing processes. It offers your ID cards, badges and driver licenses an effective combination of security and attractive appearance.

WATER CONTACT INDICATORS

Water Contact Indicators

Water Contact Indicators are that the color changed from white to red when contacting with liquid water. The color changed will not recover as initial. Water Contact Indicator Tapes can be customized for unique requirements.

Description:

Water Contact Indicators can be made with or without transparent film laminated on top.

The color of water contact indicating material will be changed from white to red once contacting with liquid water.

The size and top security printing of water sensitive security labels can be customized for unique requirements.

Structure:

Specification:

Lamination: Transparent PET film, if needed for high humidity resistance.

Face-Material of Water Contact Sensitive Labels: White absorbent indicator paper

Adhesive of Water Sensitive Sticker: Acrylic

Release Liner: 80gsm white glassine paper or transparent release film

Advantage:

- Printable of Water Sensitive Labels is good
- Humidity resistance is excellent
- Color changed speed is very fast

Unique Adhesive Formulations:

- Water Sensitive Labels have Strong bond on different surfaces
- Perfect protection for products in different applied conditions
- Excellent for security labels die cut and automation labeling

Application:

Water Contact Sensitive Labels is a cost-effective way to get fast, accurate feedback, wherever water intrusion is a concern, including:

- Validating warranty and damage claims
- Failure analysis
- Service and repair troubleshooting
- Design analysis

Hologram Pharma Labels

Introducing the latest Hologram Pharma Labels, also known as Pharmaseals. These pharmaceutical hologram labels are printed using premium quality materials and state-of-the-art machinery, resulting in stunning high-resolution production. Designed to meet diverse needs, our holograms are available in both hard and soft aluminum foil, providing unparalleled resistance against moisture, steam and gases. Its extraordinary heat resistance and strength increase its usefulness. At our core, we embrace customization, tailoring holograms to any form, media, size, and quantity, guaranteeing adaptability to meet your specific requirements. With utmost precision, our holograms incorporate all the essential information desired by our esteemed clients. We have developed specialized Holograms tailored for the Pharmaceutical Sector, meticulously engineered to ensure the impeccable sealing and security of pharmaceutical products. These holograms are intricately crafted using a combination of hard and soft aluminum, employing cutting-edge printing techniques. Enhanced by holographic stripes, our hologram collection offers a unique and unmistakable identity to exported drugs, providing an extra layer of authenticity and protection.

We take pride in offering a dedicated design team committed to providing personalized one-on-one service to meet the diverse and specific requirements of our clientele.

Key Features of our Pharmaceutical Hologram Labels include a transparent layer with a customized logo that makes these labels exclusive to brand owners, rendering them virtually impossible to replicate without the original master. The transparent holographic material adds a stunning visual effect to the packaging. We incorporate black color laser numbering with a number height of 1.2mm, multi-color printing in shades of blue, black, and yellow, and micron text that becomes visible under magnification. Furthermore, our pharma hologram labels boast sophisticated security features, including covert and forensic techniques, ensuring the utmost protection and authentication for pharmaceutical products.

Hologram Pharma Labels

In
Types of Pharmaceutical Hologram Labels:

- Transparent pharma hologram labels
- Lenticular holograms pharmaceutical stickers
- Pharma Hologram strips
- Hologram seals for Pharmaceutical industry

Salient Features of Our Hologram Pharma Labels:

Water Resistance

- Clarity in Printing
- Wear and Tear Resistance
- Sturdy Adhesiveness

Custom Made Holographic Pharma Labels:

The significance of custom-made pharma labels integrated with holograms cannot be overstated. Our range boasts pharmaceutical aluminium foil adorned with holographic stripes, presenting a pivotal solution to safeguard the authenticity of medicines. In the pharmaceutical sector, these holograms play a vital role by serving as an effective authentication tool, ensuring the identification of counterfeit pharma export drugs.

Applications of Holograms

Pharmaceuticals & Healthcare

- All types of secure pharmaceutical packaging conforming to EU Guidelines.
- Digital Authentication & Traceability Solutions.

Bank Cards / Cheques / Documents

- Highest levels of security products to safeguard against financial fraud.

FMCG & Cosmetics

- Customized labeling & secure packaging solutions for retail / consumer goods

Passports / Government Ids

- A host of document security solutions for government & legal departments.
- Security Printing solutions for Universities & Institutions to safeguard against certificate forgery.

Applications of Holograms

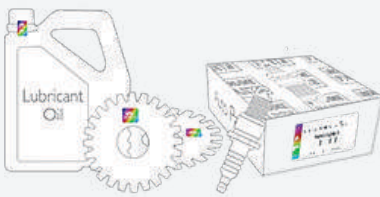

Event Tickets / Redemption Coupons

- High-security access control instruments devised to maintain the exclusivity of any event.
- Two levels of authentication – one for customers and one for the field staff / organizers.
- Perforation line for easy separation of counterfoil.
- Printed on high-quality substrates and customized finishes as per design & requirement.

Automotive Spares & Consumables

- Highly secure MRP labels for automotive spares, consumables & accessories.
- Secure holograms for High-Security Registration Plates (HSRP).

Consumer Electronics

- Anti-counterfeiting, authentication and traceability solutions for consumer electronic goods.
- Warranty Coupons.

Applications of Holograms

Apparel

- World-class brand protection solutions for apparel, footwear and luxury goods manufacturers.

Wine & Liquor

- Customized premium wine & liquor labels.
- Registered printing anti-tamper holograms for Excise Departments.

Software

- Anti-counterfeiting, authentication and traceability solutions for hardware / software products.
- Warranty Seals.

Sanitaryware

- Anti-counterfeiting & authentication solutions for sanitary hardware.

Applications of Holograms

Pesticides / Paint / Chemicals

- Anti Tamper seals for paints & other construction supplies.
- Anti-Counterfeiting solutions for packaging of seeds, pesticides, fertilizers & other agro-chemicals.

Printing & Publication

- Wide range of holographic authentication products for the publishing industry.

Mobile Phones / Accessories

- Anti-counterfeiting, authentication and traceability solutions for mobile phones and other handheld devices.

How to use the security hologram

Many people are at risk every day because of fakes. No product is safe if a few dollars can be made. Protect your reputation in the market. Secure your product!

Document Protection

Prevent scanning and copying of your valuable document/certificate by adding Manipulation of clear security holoscopes. Apply to sign valuable documents and certificates. Serial numbers can add an additional benefit to the hologram. Self-destructing holograms prevent removal and reapplication to another document.

Product Authentication

Security holograms are used in many industries, including pharmaceuticals, auto/airline parts, software, and most other consumer goods.

Apply holograms to your product for added security, visibility and ability Distinguish your goods from potential fakes. May prevent potential Liability issues as well.

Identity verification

Security Hologram

The security hologram added to your identification badges adds security and visibility. Sophisticated imaging techniques have made common identification badges a target threat. Prevent unauthorized employees from access to sensitive materials.

Butterfly bags with holographic heat seal

Solid heat seal additions increase security protection and durability of the ID card.

Pack the card in an envelope bag with a hologram, serial number and color printing.

Here is a list of industries that benefit from the use of our security holograms:

clothes

- Cigarettes
- Handbag/Wallets/Backpacks
- Media - Software, DVDs , Cds
- Consumer Electronics
- Watches/Parts
- Shoes
- Gaming/Electronics
- Sunglasses / Parts
- Headwear

Tax stamps

- Pharmaceuticals
- Auto/Aircraft Parts
- Gift Certificates
- ID cards and papers
- Phone Cards
- Lottery Tickets
- Entrance Tickets
- Transfer Permits
- Bank Documents
